Quality Council of India (QCI) is organising 20th VQC on Emerging Scenario in Food Safety & Quality on 8th March 2022. The COVID-19 has stimulated the food sector to evolve and considered new and innovative ways of keeping food safe and sustainable. The food industry was able to survive despite the immense challenges presented by the pandemic. It was only possible with adoption of use of new technology, improvisation of standard practices and implementing the latest regulatory compliances. The Conclave has been conceptualized to bring together key stakeholders on a common platform, providing them an opportunity to share and discuss on the Emerging trends in technology, standards and best practices adopted by the regulators, industry and service sector in these ever-changing circumstances.

About Conclave:

Quality Council of India (QCI) is organising 20th VQC on Emerging Scenario in Food Safety & Quality on 8th March 2022. The COVID-19 has stimulated the food sector to evolve and considered new and innovative ways of keeping food safe and sustainable. The food industry was able to survive despite the immense challenges presented by the pandemic. It was only possible with adoption of use of new technology, improvisation of standard practices and implementing the latest regulatory compliances. The Conclave has been conceptualized to bring together key stakeholders on a common platform, providing them an opportunity to share and discuss on the Emerging trends in technology, standards and best practices adopted by the regulators, industry and service sector in these ever-changing circumstances.
